## Innovative New Aesthetic Technology for 2017

### **DESCRIBE..PFD PATCH NAMED MOST INNOVATIVE LASER TATTOO PRODUCT FOR ENHANCED TATTOO REMOVAL NOW AVAILABLE & IS A PERFECT MATCH FOR THE DISCOVERY PICO PLUS**

Dr. Richard Gentile a board certified Facial Plastic Surgeon and International Aesthetic Technology Expert with offices in Youngstown and Akron Ohio is pleased to announce that we are NOW OFFERING DESCRIBE PFD PATCH in conjunction with our award winning Quanta Discovery PICO PLUS.

Perfluorodecalin (PFD) is a fluorocarbon liquid that is widely used in various medical and cosmetic applications for its ability to dissolve gasses and provide oxygen to the skin. **The PFD patch is a perfluorodecalin-infused silicone gel patch that helps reduce laser frost caused by laser-induced microbubbles, allowing for multiple laser passes in a single treatment session.** Ultimately, the PFD patch's purpose is to enable faster tattoo fading that is safe, and decrease the number of overall treatments needed to achieve complete ink removal.

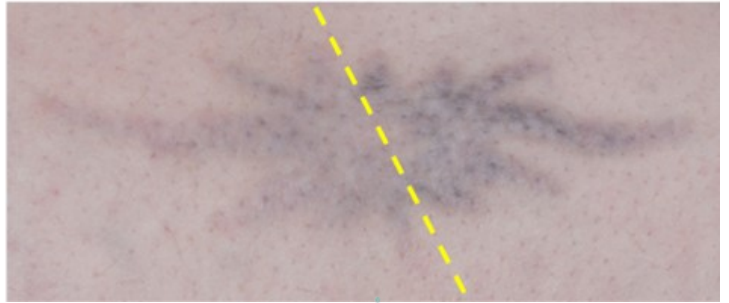

"Tattoo removal can often be a lengthy and difficult process," notes Dr. Gentile. "The DeScribe Patch allows multiple, optically effective laser passes in one brief treatment session. This is an important advancement that will benefit those with standard and recalcitrant tattoos. To date, both patients and physicians are pleased with the results." In a simple set of steps, the clinician can pre-treat a tattoo with liquid PFD provided with the Describe product, cover the area with the PFD-infused Patch, and then perform multiple laser passes directly through the Patch in a few minutes. The silicone Patch prevents evaporation of PFD, conducts heat from the epidermis and blocks ejected skin debris. The white, optically opaque bubble layer is rapidly reduced by PFD's ability to absorb gas. PFD's optical clearing properties then significantly reduce optical scattering and allow treatment lasers to penetrate more deeply into tissue, breaking up ink particles at greater depths without epidermal damage.

For more information on Dr. Gentile and his practice in Technology based Aesthetic & Laser Surgery including the treatment of Acne Scarring, Smartlipo TriPlex LaserBodySculpting<sup>®</sup>, Cellulaze, LaserSmartLift, TickleLipo, Venus Legacy, Thermi RF, Infini, Profound and Venus Viva and PICO laser tattoo removal & skin rejuvenation or to schedule a consultation with Dr. Gentile please call the office at 330-758-2001 or visit [www.facioplastics.org](http://www.facioplastics.org).
