

NeoGraft Now Available for State of the Art Hair Rejuvenation

To many, a full head of hair represents attractiveness and desirability both personally and professionally. The facts are that approximately **50 million men** and approximately **30 million women** suffer from male/female pattern baldness or thinning hair. Many potential patients shy-away from (or are not candidates for) the traditional “strip method” of hair replacement because of the slow recovery time, the loss of feeling at the incision site, the tiny linear scar on the back of the head, or the amount of post-operative pain involved. **Hair Restoration should be unnoticeable to all but those you tell.**

Gentile Plastic Surgery is excited to announce our newest offering, **NeoGraft®**. NeoGraft® introduces the “state-of-the-art” solution for hair loss. This game-changing technology automates the Follicular Unit Extraction (FUE) method to give patients more natural looking results with minimal downtime, no linear scarring and no stitches.

Top 10 Reasons Why NeoGraft® is the Solution:

It is the least invasive procedure for hair transplantation

Patients who receive NeoGraft® feel little to no discomfort

No stitches or staples are used in the NeoGraft® procedure

No unsightly linear scar

No numbness where the donor hair is harvested

Quick recovery time

Natural looking results

Less restrictions on your normal daily activities

Patients can typically go back to work the next day

Flexibility for any hair style of your choice, short or long
